

Student Name: Ashish Vidyarthi

UID: 21BCS10051

Branch: CSE

Section/Group: 903 A

Semester: 5th Semester

Date of Performance: 23/08/2022

SUBJECT: MULTIMEDIA TECHNOLOGIES

EXPERIMENT – 1

AIM: - Design a Visiting Card containing at least one graphics and text information using Adobe photoshop.

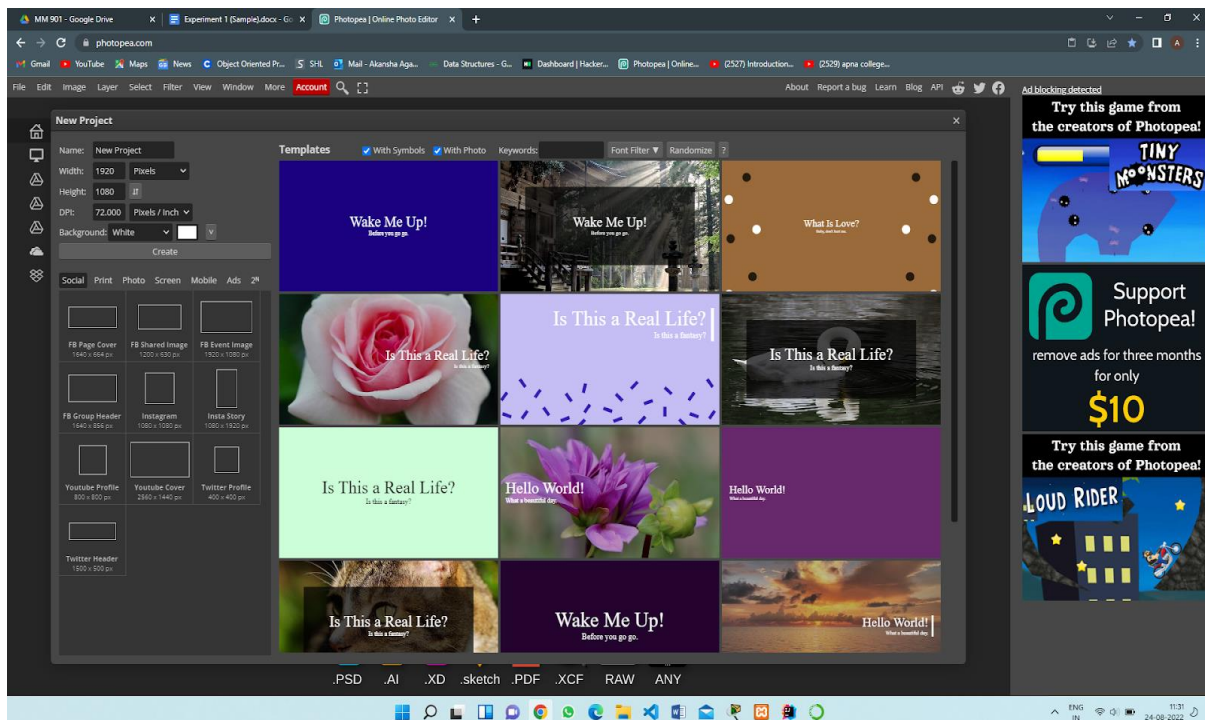

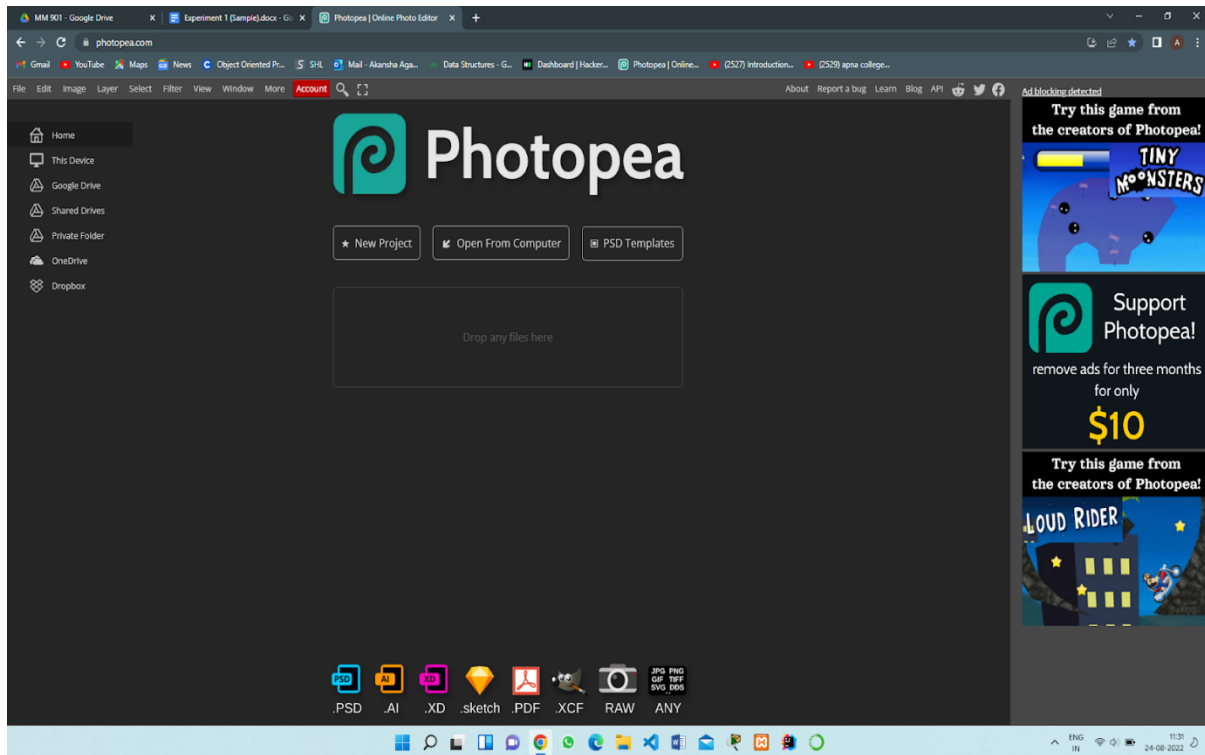

Hardware Requirements: - Minimum 384MB RAM, 100 GB hard Disk, processor with 2.1 MHz

Software Requirements: - Adobe Photoshop, Photopea

Tools Used: - Type Tool, Magic Wand, Lasso select

Study:

Step 1 :- Create the new project and set the dimensions according to the requirement.

As you can see on the above image, we set the dimensions according to the default size of the Visiting Card.

Step 2: - Now insert some icons and write some information about myself.

Step 3: - After that we need to write down some details and contact details.

OUTPUT :-
